

“Wyoming leads the nation in classroom broadband connectivity. All districts have access to our lightning fast statewide network. We must continue to build on this success.”

— Gov. Matt Mead, highlighting the Wyoming Classroom Connectivity Initiative on October 5, 2016

Pop. growth 2016–2021: 0.91%
Median age: 37.7
Right-to-work state: Yes

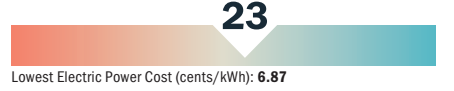

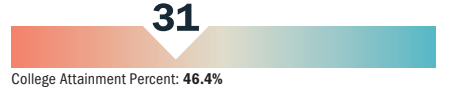

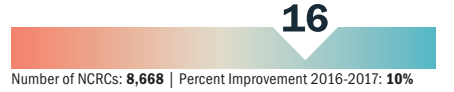

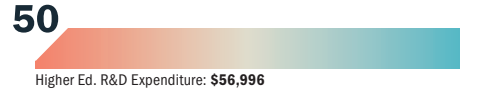

Legislative Update

- The Wyoming Legislature passed revisions to certain state business expansion programs. One such measure mandates that at least 25 percent of the total cost of expansion projects come from funding sources not provided by the state through loans and loan guarantees.
- In April, lawmakers voted to increase the speed limit from 65 mph to 70 mph on Wyoming’s vast secondary roads. Two years ago, Wyoming boosted the speed limit on its Interstates to 80 mph.
- The legislature, in May, cut about \$36 million from public school funding over the next two years as lawmakers confront a slump in tax revenues due to plunging mineral prices.

Did You Know?

Mining is the largest sector in the Wyoming economy, accounting for about one quarter of the gross state product. Oil wells were first drilled in the 1860's, and today petroleum remains one of the state's most important minerals. Wyoming also mines sodium carbonate, uranium, iron and gold.

Wyoming is the nation's least populated state. Its population of 584,000 is two-thirds that of the second-least-populous state, Alaska.

Jackson Hole has become the "Davos of central bankers" since the Kansas City Fed moved a policy-making retreat to the resort town in 1978. The annual conference is held at Jackson Lake Lodge, which remains open as the symposium takes place.

Wyoming ranked second in the 2015 Kauffman Index of Entrepreneurship, a measure of state and metropolitan startup activity. Startup firms per 100,000 resident population rose from 204.8 in 2014 to 216.3 in 2015.
