

“I’m confident that Arizona will continue to be a leader in semiconductor manufacturing for decades to come, creating thousands of jobs and bringing billions of dollars in investments.”

— Gov. Katie Hobbs, touring facilities of Taiwan Semiconductor Manufacturing Company in Taipei, Sept. 18, 2023. TSMC has committed to over \$40 billion worth of investments in Arizona.

LEGISLATIVE UPDATE

In June, Gov. Hobbs signed into law HB 2809, a bill to increase the amount the state can reimburse cities for infrastructure improvements to support major manufacturing projects. Backed by manufacturers, cities and economic development officials, the law increases the amount cities can receive to \$200 million from a previous cap of \$100 million. It updates a law adopted in 2012 that directs construction sales taxes generated by major manufacturing projects into surface roads, water and wastewater infrastructure.

Signed into law in May, Arizona’s \$17.8 billion FY 2024 budget includes \$15.5 million to expand access to “dual enrollment” classes taken in high school that also earn college credits. Supporters say the measure will enhance workforce development. Leveraging a newly created fund, students can receive reimbursements of \$50 per credit hour upon passing dual enrollment courses, with a \$300 per student cap for ninth and tenth graders and \$600 for students in 11th and 12th grades. The provision provides financial incentives for teachers and schools that offer the courses. The budget package also includes a \$300 million increase in funding for K-12 education.

In November, Gov. Hobbs ordered state agencies to conduct a childcare needs study to identify gaps, with a specific focus on supporting workers in the semiconductor industry.
